

Quick Reference Guide

www.scopus.com

Scopus is the largest abstract and citation database of peer-reviewed literature with bibliometrics tools to track, analyze and visualize research. It contains over 19,500 titles from more than 5,000 publishers around the world, covering the fields of science, technology, medicine, social sciences, and arts and humanities. Scopus has 46 million records dating back to 1823, 72% of these containing references dating from 1996.

Refine your research.

Document Search

With Scopus, you can easily start your search from the homepage. Ensure that you quickly access the article you want by using the detailed search options offered.

Starting a Search

Document Search
This tab is the main search window of the homepage. To begin, enter the search terms in the space provided. (See the box on page 8 for input rules for search terms.)

Author Search
Search for an author with the *Author search* tab.

Affiliation Search
Search for an affiliation name with the *Affiliation search* tab.

Search Items
Select which fields you wish to search.

Boolean Operators
Select from OR, AND, AND NOT to combine search terms.

Limit to Section
Control search by limiting to: published years, recently added, document type and subject area.

Add Search Field
When searching using multiple keywords and search items, click *Add search field* button.

Search History
When you return to the search window after carrying out a search, your search history will be displayed at the bottom. The search history is cleared for each new session.

Set Alerts or RSS Feeds
Select saved searches and receive email alerts and feeds

Manage Saved Searches
Select searches for editing or deleting.

The screenshot shows the Scopus search interface with the following elements:

- Navigation tabs: Sources | Analyt | Alerts | My list
- Search tabs: Document search (selected), Author search, Affiliation search, Advanced search
- Search for: heart attack in Article Title, Abstract, Keywords
- Boolean operator: AND
- Search for: stress in Article Title, Abstract, Keywords
- Buttons: Reset form, Add search field, Search
- Limit to: Date Range (inclusive) Published All years to Present, Added to Scopus in the last 7 days
- Document Type: All
- Subject Areas: Life Sciences (> 4,300 titles), Health Sciences (> 6,800 titles, 100% Medline coverage), Physical Sciences (> 7,200 titles), Social Sciences & Humanities (> 5,300 titles)
- Search button
- Search history table with columns: Search, Results, Set feed, Set alert, Save, Edit, Delete
- Search history entry: 2 (TITLE-ABS-KEY(heart attack) AND TITLE-ABS-KEY(stress))
- Results: 957

Analyze Results

One button click exports your search metrics into a new window with tabbed organization of graphs and charts for your review, export and email.

Search Alert

Set to alert you via email (*Set alert*) or RSS feed (*Set feed*) when a new article that matches your search conditions is listed. (Requires login)

Search within Results

Add additional terms to your search by directly entering them here.

Number of Search Results

The number of documents is shown.

View Citation Overview

Analyze citations by clicking View citation overview

Display Abstract Page

By clicking the article title you can show the document details (the abstract and referenced works) of the article.

Link to Full Text

By clicking *View at publisher*, you can link to the full text on each publisher's website if authorized.

Sort Options

By default, search results are listed by publication year.

Refine

In *Refine results* field either limit (*Limit to*) or exclude (*Exclude*) specific years, journals or authors, and so on. With *Add categories*, you can add additional keywords, original language or other items. Display up to 160 results by using the *Display* drop down button.

Batch Processing Results

You are able to carry out a number of different operations for multiple articles selected in the check boxes.

Download: Batch download multiple PDF files and automatically assign them names based on specified rules. The file names can be a combination of author, publication year, article title, journal, and so on. The maximum number of files you can download at one time is 50 if PDF is available. Java required.

Export: Export bibliographic information as RIS RefWorks, format (for document management programs such as EndNote), text format, BibTeX format, and Excel format. If you are using RefWorks, you can link seamlessly by embedding your RefWorks ID/PW in the My settings menu.

Print: Displays the articles in a format suited for printing.

Email: Sends the articles as an email.

Create bibliography: Change the output to typical reference list format.

Add to my list: Adds the articles to a temporary list. Later, you can check them from the *My list* menu or save the list under a new name.

View citation overview: Analyze documents that cite the selected articles. See page 5.

View cited by: Displays all documents that cite the selected articles.

View references: Displays all documents referenced by the article.

Abstract [View references \(31\)](#)

Objective: To examine associations between 9/11-related exposures, posttraumatic stress disorder (PTSD), and subsequent development of heart disease (HD). **Methods:** We prospectively followed 39,324 WTC Health Registry participants aged ≥ 18 on 9/11 for an average of 2.9 years. HD was defined as self-reported physician diagnosed angina, heart attack, and/or other HD reported between study enrollment (2003-2004) and a follow-up survey (2006-2008) in enrollees without previous HD. A PTSD Checklist (PCL) score ≥ 44 was considered PTSD. We calculated adjusted hazard ratios (AHR) and 95% confidence intervals (CI) to examine relationships between 9/11-related exposures and HD. **Results:** We identified 1162 HD cases (381 women, 781 men). In women, AHR 1.62, 95% CI 1.34-1.96 in men). A dose-response relationship was observed between PCL score and HD risk. **Conclusion:** This exploratory study suggests that exposure to the WTC dust cloud, injury on 9/11 and 9/11-related PTSD may be risk factors for HD. © 2011 Elsevier Inc.

Search Metrics

Search metrics are organized by the following: Year, Source title, Author name, Affiliation, Name Country, Document type, and Subject area.

Journal Analyzer

SJR (SCImago Journal Rank)

Using an algorithm similar to that for Google® PageRank, this prestige metric index weights citations by the quality of the citing journal and allows comparison between fields.

SNIP (Source Normalized Impact per Paper)

Taking the ease of citation by field into account, this index adjusts the citation ratio and allows comparison between journals in different fields.

Citations The total number of citations a journal receives per year.

Docs (Documents) The total number of articles published by a journal per year.

Percentage Not Cited The percentage of articles published each year that have not been cited even once previously.

Percentage Reviews The percentage of articles in a journal that are categorized as a review type article.

www.journalmetrics.com

Author Tools

Search by an Author's Name

With Scopus, you can identify specific individuals from author attribute information and Scopus search algorithmically created profiles for articles that the author has written. From the author ID you can display all articles by that author, documents that cite the author, *h*-index and more.

Starting a Search

The interface shows a search bar with tabs for Document search, Author search, Affiliation search, and Advanced search. The Author search tab is selected. Below the search bar, there are fields for Last Name (with example 'E.g., smith'), Initials or First Name, and Affiliation (with example 'E.g., university of toronto'). There is a checkbox for 'Show exact matches only'. Below these fields, there is a 'Limit to:' section with 'Subject Areas' and checkboxes for Life Sciences, Physical Sciences, Health Sciences, and Social Sciences & Humanities.

Author Name

Enter surname and initials or given name of author in *Author* box and a list of authors that may match will be shown. You can also search in combination with his/her affiliation.

Author Search

Select *Author Search* tab to search by author name.

Request to Merge Authors

Selected profiles for the same author can be merged with the simple step by step *Author Profile Wizard*.

Author Profile

displays the author's articles, documents that cite the author, *h*-index, and can analyze the citations.

Author Profile

The profile for WEINBLATT, Eve shows personal information: Name (WEINBLATT, Eve), Other formats (Weinblatt, E., WEINBLATT, E., Weinblatt, Eve), Author ID (6701714740), and Affiliation (Beth Israel Medical Center, New York, United States). The Research section shows 24 documents, 0 references, 657 total citations by 533 documents, and an h-index of 19. It also shows 'No articles published after 1995'. The Documents section lists 24 documents, with the first two being 'Ruberman, W., Weinblatt, E., Goldberg, J.D., Chaudhary, B.S. Psychosocial influences on mortality after myocardial infarction (1984) New England Journal of Medicine' and 'Ruberman, W., Weinblatt, E. Persistent risk of sudden death: ventricular arrhythmia in 88 survivors (1982) Primary Cardiology'. The 'Cited by since 1996' section shows that this author has been cited 533 times in Scopus, with the first two most recent citations being 'Kotter, S., Gerber, Y., Goldbourt, U., Drory, Y. Socioeconomic risk factor aggregation and long-term incidence of ischemic stroke in patients after first acute'.

Article Information

In the *Documents* field, check all articles by this author. Using *Author Evaluator*, show the author's research results as graphs from a number of different aspects. Use search alert to set to alert you via email (*Set alert*) or RSS feed (*Set feed*) when this author publishes another article. (Requires login)

Display Author Profile

Clicking on the author's name will show author profile.

The search results for 'WEINBLATT, Eve' show 18 of 29 results. The first three results are listed: 1. Weinblatt, Mark E. (56 documents), 2. Weinblatt, Mark E. (56 documents), and 3. WEINBLATT, Eve (29 documents). A button 'Show Profile Matches with One D' is visible at the top right of the results list.

Citations in Other Documents

In the *Citations* field, check which documents cite this author's articles. Analyze the citations of all this author's articles from *View citation overview*. Use *Author Citation Alert* to set to alert you via email (*Set alert*) when this author's articles are cited in another article. (Requires login)

h-index

This is an index that evaluates the author from the number of published works and number of citations in other documents, and is shown as *h* for articles that have been cited more than *h* times since 1996. This can be displayed as a graph from *View h-graph*.

- *Document Citation Alert*

Check My List

You can check your articles in the temporary list or the list you saved.

Change Individual Settings/Password

You can change your email address, password, RefWorks UN/PW, and so on from the *Settings* menu.

Scopus Alerts Mobile App

Scopus Alerts Mobile App lets you take Scopus with you for searching, alerting, annotating and sharing on the go. For more information; info.sciverse.com/sciverse-mobile-applications/overview

Customize

Registered users can Customize the look and behavior of their Scopus search experience.

Search Term Rules

General Rules

- Not case sensitive
- Entering singular nouns will also search for plural nouns and possessives (with some exceptions)
- Entering either variation of Greek letters (α OR alpha, β OR beta,) will search for both variations
- Entering either British or American spellings (colour, color, or tyre, tire) will search for both variations

Phrase Search

- Multiple words set off by spaces will be processed with the *AND* operator.
- To search as a phrase, enclose it in double quote marks or curly brackets.
 - *Double quotes " "* will search for fuzzy phrases. It will also search for both singular and plurals (with some exceptions). Symbols are ignored. Wildcards can be used. *"heart-attack" will search for heart-attack, heart attack, heart attacks, and so on*
 - *Curly brackets { }* will search for a specific phrase. It limits the search to only the specified character string, and symbols can be used. *{heart-attack} will only search for heart-attack*

Wildcards

- *** replaces any number of characters
toxi will search for toxin, toxic, toxicity, toxicology, and so on*
- *?* replaces only one character
sawt??th will search for sawtooth and sawteeth

Logical operators and proximity operators

- *AND* Searches for articles containing both words
food AND poison
- *OR* Searches for articles containing either or both words
weather OR climate
- *AND NOT* Searches for articles that do not contain the following words
tumor AND NOT malignant
- *W/n* Restricts to n words between the two words, the word order is not set
Pain W/5 morphine
- *PRE/n* Restricts to n words between the two words, the word order is as set
newborn PRE/3 screening
- Operator priority order (it is possible to change the priority order by using parentheses)
1. OR 2. W/n or PRE/n 3. AND 4. AND NOT

For more information on searching, see the in-product help files
